

Flashlube Valve Saver Fluid has been sold in Australia and internationally for over 30 years.

## Test Results

Photos show results of testing with & without Flashlube Valve Saver Fluid

**WITHOUT FLASHLUBE**

**Left** valve seats recede into cylinder head resulting in a loss of compression.

**WITH FLASHLUBE**

**Right** shows valve & seat protected with Flashlube.

## Valve Saver Fluid

Flashlube Valve Saver Fluid is available in 50ml, 250ml, 500ml, 1 litre, 2.5 litre, 5 litre & 20 litre pack sizes.

## Other Products in the Flashlube range

- › Injector Cleaner
- › Diesel Conditioner
- › Oil Stabiliser
- › Multi Purpose Grease
- › High Temperature Grease
- › Winter Fuel Formula

Flashlube is recognised as a world leader in it's field and is available in over 80 countries globally.

Our unique formulation ensures Flashlube Valve Saver Fluid maintains it's No1 position in the marketplace.

# VALVE SAVER FLUID

## LPG/CNG PROTECTION

## VALVE SAVER FLUID

**Flashlube Valve Saver Fluid has been developed as a direct partner for LPG/CNG converted engines providing protection against Valve Seat Recession (VSR)**

### LPG/CNG, Why the Need for Lubrication?

Not all engines are designed with LPG/CNG as the preferred fuel.

LPG/CNG are dry burning fuels that combust at a higher temperature than petrol.

These extreme temperatures can cause Valve Seat Recession (VSR) leading to valve burning, lack of performance, loss of compression and premature engine failure.

### How it works

Flashlube Valve Saver Fluid forms a protective coating; the effect of separating the two metals by a film of lubricant prevents metal-to-metal contact, stopping Valve Seat Recession.

Flashlube Valve Saver Fluid also contains a unique combination of additives to give a more complete burn in the combustion chamber reducing emissions and fuel consumption, and improving power.

The formulation contains concentrated cleaning agents to allow deposits to blend with the gases burned in the combustion chamber, maintaining combustion efficiency.

Flashlube's unique formula will not harm catalytic converters or oxygen sensors.

### Benefits

- › Protects valves & valve seats.
- › Reduces harmful emissions.
- › Lubricates upper cylinder area.
- › Safe to use in all late model vehicles (will not harm catalytic converters or oxygen sensors).
- › Ideal for 2 & 4 stroke engines (use with fuel/oil mixture).
- › Economical - 50ml treats 50 litres of fuel
- › Increases engine life.
- › Cleans injectors & fuel systems
- › Increases fuel economy (by up to 5.3%).

As a lead replacement on all pre 1986 petrol engines, Flashlube Valve Saver Fluid is added to the fuel tank at the rate of 50ml to 50 litres.

## VALVE SAVER KITS

Three kits available, Valve Saver Kit (Series 2) with low level sensor, the original FVSK model which has been used for over thirty years plus our award winning Electronic Kit.

The Flashlube Valve Saver Kit is the way to automatically inject Flashlube Valve Saver Fluid directly into your vehicles fuel system. One full reservoir (400ml) in this low maintenance system provides valve & valve seat protection for your vehicle for up to 4000km (treats 400 litres of fuel). Easy installation can be completed in 15 to 30 minutes to most vehicles.

### Application

The Flashlube Valve Saver Kits can be fitted to any LPG, CNG or Petrol powered vehicles, Forklifts, Agricultural and Industrial engines.

They must be used only with Flashlube Valve Saver Fluid. Using any other product will contaminate the micronite filter system & potentially damage the Flashlube feeder hose, voiding the warranty.

### Features

- › Easy Installation Instructions
- › Flashlube Valve Saver Fluid
- › High Quality Construction
- › 3 Year Warranty
- › Australian Made
